We're expanding our temporary security solutions with our new solar-powered CCTV towers! Offering a flexible, reliable security solution for construction sites, vacant properties and remote locations, they provide around-the-clock protection without the need for a mains power supply. A great way to help deter crime and keep your site secure.

NEW CONTRACTS: PROTECTING MOUNT ST MARY'S COLLEGE, SPINKHILL

August 2026: We're delighted to have secured a new contract at Mount St Mary's College in Spinkhill, providing a bespoke, hybrid security solution to protect the historic site from antisocial behaviour and trespassing.

Following a detailed site survey, we implemented a tailored approach combining advanced CCTV technology, 24/7 control room monitoring and a visible on-site security presence. In the first few weeks, our teams detected and responded to over 30 trespassers, with the site remaining incident-free since mid-September.

We're proud to be helping protect the property and provide greater peace of mind for our client and the local community.
