## Key Holding & Alarm Response

## Step 6: Resolution or Further Action

Depending on the situation, the key holder takes appropriate action, such as resetting the alarm, contacting emergency services, or coordinating with the property owner.

# Step 5: Security Assessment

The key holder evaluates the nature of the alarm (e.g., intrusion, fire) and assesses any potential threats or hazards.

### **Step 1: Alarm Activation**

The alarm system detects an intrusion, fire, or other emergency, triggering an alarm signal.

## Step 2: Alarm Notification

Doyle Security's monitoring center receives the alarm signal and notifies the appropriate response team.

### **Step 4: Arrives on Site**

The key holder arrives at the premises and assesses the situation

#### **Step 3: Dispatch Key Holder**

A trained key holder from Doyle Security is dispatched to the location of the alarm.
